666 cures a Cold quickly. adv.

As The Falcon goes to press Thursday the condition of Mrs. W. S. Newby is disquieting to her family and friends. She underwent a very serious operation more than two weeks ago at a Memphis hospital and was brought home several days ago, where little improvement has been noted in her condition. She has shown wonderful vitality and hopes are that she will yet rally and be well again.

With the coming of September one counts the summer about over, and the one just gone will be remembered as one of the hottest seen in this section in an average life time. When the rains ceased in early May, the temperature rose all at once from that of the rainy cool spring up to the hottest summer remaining so thru May, June and July, with hardly a day of relief to a suffering humanity. Crops suffered from the drought and heat, ponds dried up and stock water became scarce, pastures ceased to grow grasses for stock. It all reminds us again that it would be a long, long year without the change of seasons.

Farmers in town Saturday and since then tell us that army worms are doing tremendous damage in nearly every part of the county. Many fields are said to be stripped of foliage and blooms and young bolls are shedding as fast as formed. It is said, too, that many parts of the county are suffering from the boll weevil and much damage is being done by them. Shedding from recent rains has caused a heavy loss and all in all, farmers are of the opinion that the crop is far less promising than it was two or three weeks ago. The bolls formed in July are better in number than usual and many farmers say that these July bolls, the lower crop, are about all that the cotton plant now promises for the year's crop. We have seldom seen opinion change more rapidly than it has in three weeks as to the coming yield.

Tom Beal has full control of the Bon Ton Wood and Coal Yard and will serve the people with pleasure at all times, with both coal and wood. Tom Beal adv. tf.

A Falcon representative visited the new high school dormitory Wednesday and found it in spic and span condition. Prof. and Mrs. Cozine who will run the dormitory moved to it some time ago and have been busy renovating the interior from cellar to garret and they have it now ready for pupils who will go to board for the coming school term. Already around a dozen out-of-town pupils have arranged to board at the dormitory and Prof. Cozine says he has room for several others. New furniture has been purchased and installed at the entire building presents that clean new appearance that one's own home does, and has the needed appointments to make life comfortable for those who take advantage of the opportunity of being here.

666 cures Biliousness. adv.

J. S. Taylor of the Planters Gin Company returned Tuesday from a visit to Mississippi and Arkansas and reports that cotton crop conditions are bad in those sections visited. He found boll weevil infestation bad everywhere he went and the crop terribly damaged by them. He brought back with him a pint fruit jar full of half grown bolls that had been punctured by weevil and ruined and in the jar a number of the full grown weevils, and a look at them will convince any man that the weevils seen so often in Fayette county in past few years is the genuine boll weevil. Mr. Taylor left the jar at The Falcon office and those who desire to see the ruined bolls, the weevils, and their work can call here and see them. Several farmers have compared the weevils in this jar with some brought to this office recently by Robert Parsons from the fifteenth district and they are unquestionably the same. And it appears from this jar of bolls that when Mr. Weevil don't find squares and tiny bolls to work on he goes to the larger bolls and ruins them.

666 cures Chills and Fever. adv.

Secretary W. G. Shelton of the Democratic County Committee informs us that the twelve candidates announced in these columns for the race for county

offices before the October 1 primary have qualified with him according to the resolutions of the committee by posting the proper pledge to support the nominees of the primary, together with their checks each for \$30, and they are all duly and properly in the race. The committee meets this Thursday afternoon at 2:30 to name election officers and attend to other business that may arise. The twelve named are the only candidates who have qualified for the primary. Their names can be seen in the announcement column of this issue.

666 cures Malarial Fever. adv.

F. H. Lightfoot is building in the rear of his lumber shed on the public square a sweet potato curing and storage house to take care of four or five thousand bushels of potatoes the coming season. He will complete his house by digging time and will buy the tubers from those wanting to sell and will cure them for a satisfactory market. This is the first step we have heard of to take care of the largely increased crop of sweet potatoes this section will raise this year. There would seem a need for several houses as large as this if the yield is anything like it should be with the larger acreage than has been in former years.

The firm of Maddox & Summers, Insurance Agents, changes office September 1, to Mayo & Summers, L. Mayo having bought out the interest of Capt. E. A. Maddox in the business. Mr. Mayo is moving his office to the office over the Rhea Drug Company, where he will take an active interest in the insurance business and will continue his legal practice as in the past.

Mrs. L. A. Kerr of Holly Grove, Arkansas; and two children are in this county, guests of her parents, Mr. and Mrs. W. A. Winfrey.

Everything for QUALITY —nothing for show

THAT'S OUR IDEA in making
CAMELS—the Quality Cigarette.

Why, just buy Camels and look at the package! It's the best packing science has devised to keep cigarettes fresh and full flavored for your taste. Heavy paper outside—secure foil wrapping inside and the revenue stamp over the end to seal the package and keep it air-tight.

And note this! There's nothing flashy about the Camel package. No extra wrappings that do not improve the smoke. Not a cent of needless expense that must come out of the quality of the tobacco.

Camels wonderful and exclusive Quality wins on merit alone.

Because, men smoke Camels who want the taste and fragrance of the finest tobaccos, expertly blended. Men smoke Camels for Camels smooth, refreshing mildness and their freedom from cigarette aftertaste.

Camels are made for men who think for themselves.

Camel
